

## Adrian Aparisi

### Information Security Consultant

Adrian is a driven person with a burning passion for IT, and has a high level of knowledge spread between different fields of IT. Mainly working with pentests, security vulnerability reporting and security documentation, as well as handling security related questions pertaining to ISMS (ISO Standard 27001, NIST). Adrian works fluently and confidently on a large variety of operative systems and programming languages, allowing him to risk-assess many systems.

Adrian has an OSCP certificate, and has an eye and experience to notice, identify and document vulnerabilities and risks. In 2018 Adrian was granted the "Freelance Honorary Achievement Award" by NASA for developing a prototype RFID storage solution for use in zero gravity environments.

Adrian is experienced and comfortable in international environments and can very easily acclimate to varying types of ways of working.
