SUMMARY

Experienced, certified and passionate security consultant and solver of any problem IT-related. Experienced with everything ranging from Windows Server 2007 to Unix-baserad systems as well as front- and backend development

SKILLS

Server & system Architecture
My education in computer security makes me well versed in the fundamentals of most system architectures, as well as comfortable with most communication protocols.

Scripting Languages
With previous work experience at HCK associates, I became comfortable with scripting in languages such as Shell, Python, Node,JS(JS) and Batch

Programming
Experienced in PHP, HTML, JS, RUBY, as well as in Python. Previously developed in C# andJava. Very comfortable with object-oriented programming

Problem solving
My love for pussles and problem solving comb ined with my experience as a technician and IT-Security consultant gives me a certain profiency in both identifying and developing solutions for problems
